EUROPE'S LEADING INDEPENDENT BRAKE PAD MANUFACTURER FOR CARS, MOTORCYCLES, KARTS AND MOUNTAIN BIKES

Job Description - Toolmaker

SUMMARY

To make and maintain tools for the Pressworks Engineering Department.

PRIMARY RESPONSIBILITIES

1. Make progression tools, second op tooling, jigs and fixtures
2. On-going tool maintenance, troubleshooting and improvements.

QUALITIES, KNOWLEDGE AND SKILLS

1. Must be able to work on own initiative
2. Proven efficiency with working practices
3. Be able to communicate effectively to own team and other departments
4. Be organised and have the ability to prioritise and multi-task
5. Attention to detail
6. Flexible working hours
7. CNC and Sodick wire eroding machine experience an advantage (training given to right candidate).

WORKING CONDITIONS

Full time position- 40.5 hours per week

Working conditions are normal for an engineering pressworks environment, ear defenders will be worn.

The Job is within a new steel and aluminium pressworks facility serving the Motorcycle and Automotive industry in the Pineham/Swan Valley Northampton district and involves the use of power presses for mass production blanking out of steel and alloy components and their processing to final product involving a variety of presses including form and blank pressing, second operation pressworks, de-burring and inspection.

Reporting to the Pressworks Engineering Manager
