

EBC **BRAKES**[®] RACING

Laser-cut from titanium sheet and perforated to reduce conductive heat transfer, the EBC titanium shims come in sets of four or eight depending on caliper type.

Shims are applied to your pad set and can be re-used at pad change unless damaged BUT if your pad set has already arrived with a rubberised shim glued to the reverse of the backing plates you will **NEED TO REMOVE** those first, **you should NOT attach the Ti shim over the top of the old shim** or you will create an over thickness and caliper-pad drag.

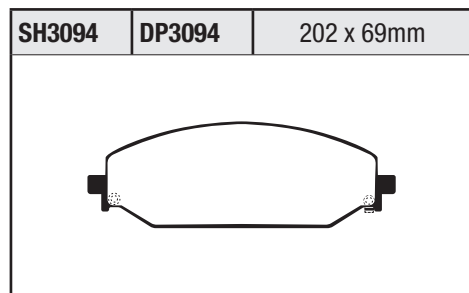

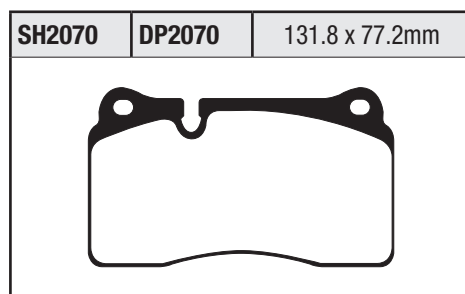

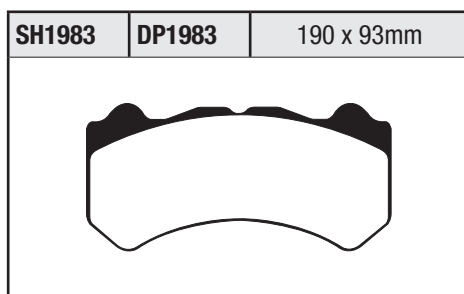

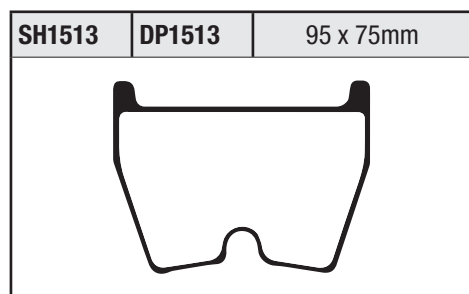

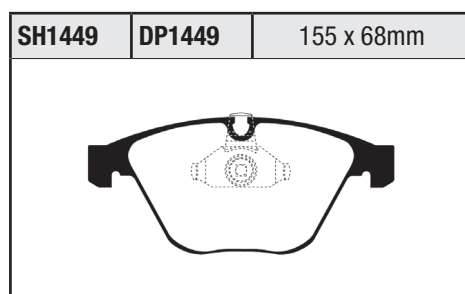

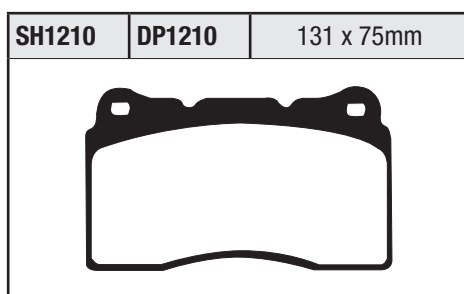

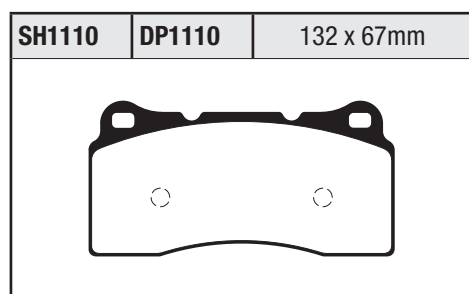

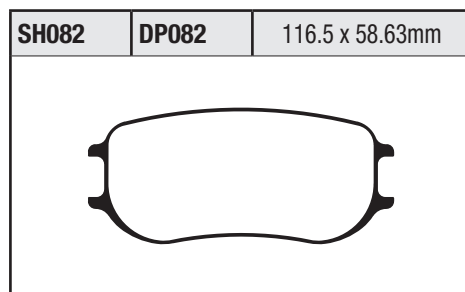

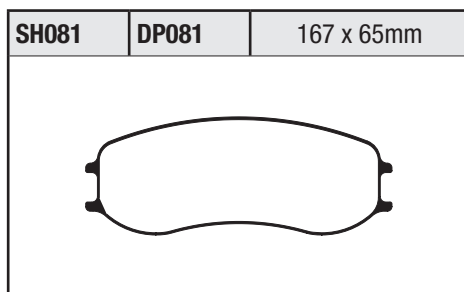

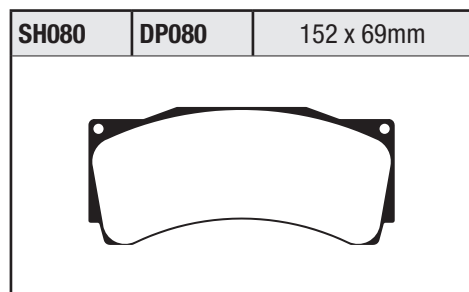

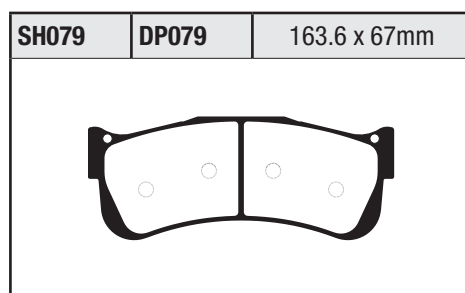

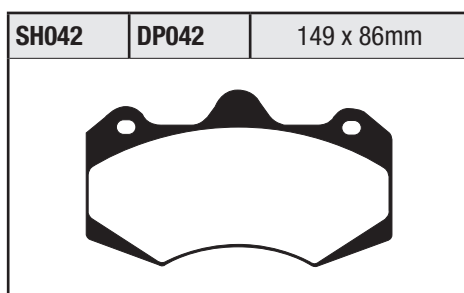

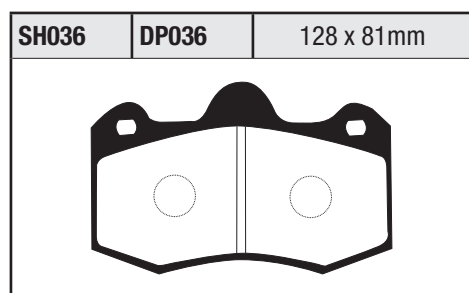

To do this take a blunt knife and slide it below the old, rubberised shim to peel it away from its glued placement on the back plate, clear up the backplate glue residue then clip the Ti shim onto you pad.

EBC Brakes' titanium shims are designed to reduce heat transfer on all types of pads and reduce heat transfer by up to 100 degrees F.

Most caliper seals are damaged at temperatures over 130°C/270°F, which means anything to reduce heat getting to them is good news.

All New Titanium Shims – available for the below pad shapes

SH001	DP001	101 x 62mm	SH002	DP002	132 x 54mm	SH003	DP003	114 x 43mm
SH005	DP005	152 x 80mm	SH006	DP006	152 x 80mm	SH008	DP008	114 x 50mm
SH012	DP012	152 x 80mm	SH016	DP016	132 x 62mm	SH032	DP032	152 x 80mm
